Kirill Abrosimov

ML/AI Engineer, Data Scientist, MIR Researcher

kirillabrosimov@uvic.ca · +1 778 587 8636 ·
Victoria, BC, Canada · Kirill Abrosimov · Personal Page

Skills

- Python
- PyTorch
- Speech Technologies
- Music Information Retrieval
- Data&Text Mining
- Operations Research
- MLOps Tools
- Git
- Linux
- Pedagogical Design

Languages

- Russian — Fluent
- English — B2

About Me

ML/AI Engineer with 5+ years of industry experience (**Speech technologies**: ASR and TTS systems, speech biometrics; **Text Mining**: streaming clustering, named entity recognition, automatic summation, RAG systems and work with LLM; **AI in logistics**: methods of operation research and machine learning for automation of dispatchers). **PhD student** at UVic in Computer Science (Computational Musicology & MIR).

Education

PhD in Computer Science
Sep 2025 - Present

University of Victoria

Scientific Field: Music Information Retrieval. Adviser: George Tzanetakis

MSc in Speech technology & ML
Sep 2021 - Jul 2023

ITMO University

GPA: 4.91 / 5.00. Master's thesis: "Development of singing voice synthesis components in MIR systems". Project (collaboration: Ulm University, Germany): "Improving natural-language text classification through identifying and fixing problems" (based on methods of interpretation of neural networks predictions and cleaning data algorithms)

BSc in Computer science and engineering
Sep 2017 - Jul 2021

Nizhny Novgorod State Technical University n.a. R.E. Alekseev

GPA: 4.86 / 5.00. Bachelor's thesis: "Music generation algorithm based on ABC notation and distributive semantics".

Publications (main)

Linguistic Tools in Musical Stylometry
20 December 2025

University of Victoria

Abrosimov, Kirill, et al. "Linguistic Tools in Musical Stylometry." Anthology of Computers and the Humanities 3 (2025): 641-652.

Sodner for Russian nested named entity recognition
20 June 2022

ITMO University

Abrosimov, K. I., and A. G. Mosyagina. "Sodner for Russian nested named entity recognition." Computational Linguistics and Intellectual Technologies: Papers from the Annual International Conference "Dialogue". No. 21. 2022.

Work Experience

ML/AI engineer (Speech Technology)
Apr 2025 - Present

ITooLabs, Project

Development of speech recognition systems, advanced training, data processing, working with LLM to solve text analytics problems, acceleration of model inference.

Data Scientist
Aug 2022 - Apr 2025

Factory 5 Dev, Russia, Remote

Development of an automated dispatcher system for optimal planning of carriage of wagons, based on methods of operations research and machine learning. Creating and researching a simulation model to detect flaws. Application and research of reinforcement learning methods for optimization problems.

Sessional Lecturer/Instructor
Sep 2022 - May 2025

ITMO University, Russia, Saint-Petersburg

Development of small elective courses, materials. Conducting these courses, checking homework, assessing students' knowledge, maintaining educational documentation. Courses: "Introduction to Computational Musicology", "Nature-inspired Algorithms", "Basics of Game AI".

ML engineer (NLP)
Sep 2021 - Aug 2022

Seldon News, Russia, Remote

Development and research of neural network models for extracting named entities and facts. Creation of clustering systems for text documents to automate the processing of news flow.

Python developer
Feb 2021 - Aug 2021

Neuro.net, Russia, Nizhniy Novgorod

Development of conversational bots for call center automation, development of conversation logic, application of NLU, TTS, ASR in production, which were trained by Data Scientists.

Intern Bachelor of Software Development Group
Sep 2019 - Jun 2020

Intel, Russia, Nizhniy Novgorod

Development of tools for real-time systems based on Linux and modern Intel processors (such as TigerLakes, IceLakes).

Summer Internship Intern
Jun 2019 - Aug 2019

Intel, Russia, Nizhniy Novgorod

Project: "Expansion of Functionality Supported by Gradient Boosting into Intel DAAL" (included: implementation of computing feature importance for Gradient Boosting and Random Forest).

Tutor
Aug 2018 - Aug 2021

Maximum Education, Russia, Nizhniy Novgorod

Preparing students for the school final exam in computer science. For three years, I conducted classes with 5 groups, 3 groups studied offline and 2 online. As well as improving the course and developing materials.
